DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6,8, 11-12, and 19-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Minkler 3560178.

Looking to figure 1: 14-14 are the continuous filaments drawn from a multiplicity of streams. 16 is the wheel which gathers the filaments into yarn 18. As to the monitoring the position of the wheel: see from col. 1, line 51 to col. 2, line 72.

As to the “predetermined tension” - it is deemed that Minkler inherently has a tension that is predetermined by the weight and the lengths of the arms. Alternatively: the limitation merely state the intention “to determine whether a tension” There is no requirement of a step of determining whether the tension falls below a predetermined tension. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Claim 2: see col. 2, lines 32-34.

Claims 3 and 8 are met in as much as Applicant's invention meets it (see the 112 rejection below).

Claim 6 is clearly met.

Art Unit: 1731

Claims 11- 12: col. 1, line27.

Claims 19-24 are clearly met – in as much as Applicant's invention reads on them.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3, 8 and 16 and 21-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 3 and 8 and 21 require a "lever with a magnetic detector". There is no support for the lever having the detector. Nor does there appear to be a lever with the two ends as claimed. Although there is basis for a lever, it does not appear to have the two ends as claimed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 8 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The end of claims 3 and 8 is the clause "the second end of the lever connected to the wheel". It is unclear what this requires. Is it a step of connecting? Is there a missing conjunction, such as "Or", "and", "wherein", "without"? There appears to be a missing verb, but it is unclear what that would be.

Claim 21: there is no antecedent basis for "the lever with a magnetic detector".

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1731

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
